

# How the First Amendment Protects Online Speech

## *But what if I don't like a company's content moderation standards?*

There is a vast amount of competition in the social media marketplace. To name a few:

- YouTube
- WhatsApp
- Parler
- Twitter
- Facebook
- Instagram
- Snap
- TikTok
- Truth Social
- Rumble
- Reddit
- Substack

## *Concerned about government coercing social media companies to remove content?*

**Legislation like H.R. 8752, the Protecting Speech from Government Interference Act, can help.**

If passed, the bill from Reps. Jim Jordan and Cathy McMorris Rodgers would protect American citizens & businesses from being coerced to suppress speech by politically-motivated bureaucrats.
