

10 Reasons to Reject the Open App Markets Act

- 1** It leaves Americans' data vulnerable to privacy and security concerns.
- 2** It will stifle the American economy.
- 3** It amounts to the government picking winners and losers in the market...
- 4** ...by narrowly targeting two companies...
- 5** ...but ignoring others, like Microsoft's Xbox app store.
- 6** It will create more headaches for American users online.
- 7** Our children may be exposed to malicious actors hoping to exploit them.
- 8** It hasn't had a hearing in Congress.
- 9** Americans don't support its provisions....
- 10** ...Nor do other Members of Congress—even Democrats!

As Congress moves to close Lame Duck legislating, they should throw out progressive pet projects like OAMA, which harm American cybersecurity, innovation, and economic health.
