

# Reject the Journalism Competition and Preservation Act

If passed, JCPA would...

- 1** Make it more difficult and costly to get and share information from small, local news sources
- 2** Give government bureaucrats influence over information availability
- 3** Provide an antitrust exemption for politically well-connected news media companies
- 4** Further undermine the independence, public trust, and integrity of the media
- 5** Diminish competition by creating a protection from existing antitrust laws for certain news companies and allows them to collude with one another
